Webinar on COVIDPEDIA: How covid affected our lives and how to deal with it.

Vivekananda School of Information Technology organized an event on “Covidpedia: How covid affected our lives and how to deal with it.” on 26-02-2022 at 1:30 PM under the guidance of the faculty **Ms. Kanta Malik**.

It is an undeniable fact that covid affected people and they faced serious problems and even deaths all around the globe which caused a global pandemic. People across the globe were confused, stressed and anxious to overcome these unpredictable times. To address this and discuss further precautions that we can take as of now, we conducted a webinar on “Covidpedia”. It was attended by 104 students. The objective was to motivate students to know protective measures that they can take for the current situation or any future scenarios like this.

The session was addressed by the speaker **Dr. Shibu Sasidharan**, who is a faculty of Anesthesiology and Critical Care, working with the Indian Armed Forces Medical Services. He talked about common problems faced during the start of the pandemic, how they spread throughout the world, its different phases and how people dealt with them during that time. He then explained the common symptoms people show during pre covid and post covid days. He also elaborated on the do's and don'ts to further prevent the disease and how to cope mentally if the situation worsens in the future. After the informative session, an interactive session was held where the students asked several questions based on their experience. The positive views and answers by the speaker surely helped the students in figuring out their issues related to the pandemic. The event received positive feedback from the students.
