Webinar on RESEARCH GAP: IDENTIFICATION OF NEW KNOWLEDGE

Vivekananda School of Information Technology organized an event on “Research Gap: Identification of New Knowledge” on 15th March 2022 at 2:00 P.M on MS Teams.

Working on a research project will be a challenging and rewarding experience provided one puts the best of one’s expertise and skill into it. It is an opportunity that helps one to pursue an in-depth or deep original study about any topic of interest. To address this and motivate students to take up research work the department conducted a webinar on “Research Gap” under the guidance of the faculty coordinator **Ms. Kanta Malik**. The objective was to give the students an insight into the research gap, its meaning, importance, its identification and different types.

The session was addressed by the speaker **Dr. Yogesh Mehta** who is an Associate Professor, Strategy and Entrepreneurship, Convener-Research Program, FCAM, SGT University, Gurugram, Haryana. He talked about research and its meaning before moving on to explain the research gap and its importance. He also shared his knowledge about identifying research gaps and their different types. After the presentation session, a Q&A session was held where students asked several questions. The immense knowledge shown and answers given by the speaker surely helped the students in clearing their doubts. The session was attended by 95 students and faculty members. The event received appreciation from the attendees.
