Webinar on Importance of Soft Skills and Personality Development in IT Industry

Date: 28th January 2022

Soft Skills and Personality Development are major time savers. The better you become, the less time it takes you to achieve your goals. Soft skills are an essential part of improving one's ability to work with others and can have a positive influence on furthering your career. We use soft skills every day at work and developing these soft skills will help you win more business and accelerate your career progression. It is not the strongest or most intelligent who will survive but those who can best manage change.

Vivekananda School of Information Technology (VSIT) organized a WEBINAR on "Importance of Soft Skills and Personality Development in IT Industry"- to throw light on how soft skills and a strong personality can change the entire course of your career. It was an informative webinar conducted by **Ms. Twinkle Lalwani** where she talked about the need and importance of soft skills and personality development. Ms. Lalwani is a positive psychologist. Along with that, she is a soft skills trainer and anti-procrastination coach. She has more than 8 years of experience in lifestyle coaching. The main purpose of the session was that the students should be able to develop effective communication and presentation skills. The students should become self-confident individuals by mastering interpersonal skills, team management skills, and leadership skills. The event was organized by the students under the guidance of faculty coordinator **Ms. Kanta Malik**, with around 140 attendees in the event. It was a successful event; the students also participated and enjoyed the session and gained a lot of knowledge.
